

Fun Fact! Did You Know That the Rothschilds Ended Up Owning Russia's Oil After All the "Free Market" Reforms of the 90s?

Do you feel freer yet?

I came across an interesting post by Oleg Tsarev that I thought I'd share.

There was a recent interview by Khodorkovsky of Yukos Oil fame. If you don't know the story, it goes, roughly-speaking, something like this. Khodorkovsky decided to make a move to buy Yukos with the help of Exxon. This would put him in charge of essentially a near-monopoly on oil in Russia. To do this though, he moved against Putin and his spook/oligarch circle. Because Khodorkovsky and his friend Berezovsky had helped Putin get elected in the first place by rigging the elections and providing wall-to-wall positive media coverage of Putin, they probably thought that he was their guy.

However, as many of you know, Putin famously moved against Berezovsky and Khodorkovsky. The faction that moved against Putin and his inner circle were sent with their tails tucked between their legs to London from where they have been funding various Permanent Opposition projects since. Most egregious is the Yabloko party, which is nothing more than an organized pederasty ring masquerading as a political party.

Anyway, we will cover all of that in a separate dedicated article eventually.

We are still on Andropov at the moment and after that we will have to cover Yeltsin.

It is important to understand that there are only two real political camps in Russia — the "conservative" Convergionists and the "liberal" Convergionists. Both camps want to join the NWO, but the conservatives want better terms for the elites in Moscow and are willing to play hardball using Slavic lives as cannon-fodder to force the West to honor the pledges they made to the Soviet elite to rule over the world as equals. Putin got his political start as a "liberal" Convergionist working to reduce Russia into a satrapy of Washington. He did, however, change his tune and start demanding that at least some of the original promises made to the USSR elite be kept.

This eventually earned him the ire of the Western press, which decided to portray him as Literally Hitler™.

Naturally, using the simple “enemy of my enemy must be friend” heuristic, many disgruntled Westerners decided that Putin must actually, secretly be Our Guv™.

This, in a nutshell, is the “common sense” position that I have been writing about on my blog. Because neither of these portrayals of Putin is accurate, I will leave the weeds of what really happened in-depth, eventually.

Suffice it to say that the Yukos Oil/Khodorkovsky crisis was a major factor in the shift of slightly less liberal Liberals in the West as proof that I am not a paranoid nutjob. So, with all of that preamble out of the way, [here](#) is my take on the matter.

The ex-owner of the Yukos oil company, the large oil company that was nationalized in the early 21st century, oligarch-foreign agent Mikhail Khodorkovsky, was a key figure in the **privatization of the seven-banker system** in Russia.

You won’t believe this, but the so-called Seven Bankers were not all Jewish bankers. They were all *ethnic* bankers. And some say there were actually more than seven.

Jacob Rothschild served as head of the London branch from 1990 to 2024. He died in February of this year. It was this man who headed the British branch of the family at a time when the assets of the USSR were privatized for pennies.

Moreover, from Khodorkovsky’s words it is clear that privatization took place under the control of the Rothschilds.

In October 2003, the American newspaper The Washington Post, commenting on the Yukos case, wrote in panic: **“In dollar terms, we are witnessing the largest illegal expropriation of Jewish property in Europe since the Nazi pogroms of the 1930s.”**

This was pretty much the origin of the “Putin is Literally Hitler™” narrative talking point.

Nazi Seizure Ends Austrian Bank Power

BY LAURENCE BURD.

When the Rothschild family last week filed suit to save more than \$3,200,000 of assets from confiscation, by the German Nazi government, it brought to a focus the death blow dealt by Hitler to the once powerful Viennese financial stronghold with the wiping out of Austria. When Hitler marched into Vienna, Baron Louis von Rothschild, 1st head of the Vienna branch of the family, was arrested and his properties, including the Rothchild bank, were confiscated.

Germany Reportedly Not Satisfied With \$600,000 For Release of Rothschild

TOKYO, Aug. 20 (UPI)—Germany's authorities are in accord with a Japanese decision, 200,000 "Yen" offered for the release of Baron Louis de Rothschild, 1st head of the Vienna branch of the Rothschild family, arrested in December, 1938, in Vienna, according to the Japanese Foreign Ministry.

The Japanese Foreign Ministry, offering the Yen, said the release of the noted金融家, held by the Nazi authorities since December, 1938, was "desirable" in view of the fact that the man, described as "one of the most powerful men in Austria," was "not willing to cause a considerable inconvenience" to Austria.

The ultimate decision regarding the Japanese offer, however, will be made by the Vienna government, which has been unable to agree on the matter.

And so, on through the 19th century, until the revolutions of 1848 the House of Rothschild grew in Vienna and throughout Europe, though each of the five houses is an individual firm, they collaborate by contractual agreement on major deals, and by their unity add to their individual strengths.

But, like, if Putler had made a move against *anyone* with any wealth or power in Russia at the time, he'd be making a Hitler antisemitism. I'm sure if he could, he would have moved against Russians with money and influence, but, sadly, there simply were none.

For my part, I have written many times that the results of the criminal privatization program (<https://t.me/olegtsarov/12545>) need to be reconsidered. And to do this using transparent mechanisms. Offer to pay extra based on the real value of the privatized companies, or return them to state ownership with a refund of the money that was paid for the assets.

Uh-oh! Seems that Tsarev is advocating for the nationalization of stolen assets that are now in the hands of private ethnic bankers. That means that he is Literally Hitler™ too!

Therefore, I strongly support the return of YUKOS to state ownership. Correct solution. But now I wanted to focus on something else.

I asked people involved in international politics why Great Britain has such an irrational hatred of Russia. What causes this? It is logically impossible to explain this. Two capitalist countries, there are no ideological contradictions, but the confrontation is obvious.

The "Anglo-Saxons" who run the City of London (the autonomous little Hong Kong in the center of London) hate Russia because of ethnic resentment.

They just hate Slavs.

They also hate other Europeans like Germans too, but not as much as the *Ur-uses*, as we used to be called — the Old Ones.

You even get this hatred of Russians in the writings of the early Church Fathers too. At the time, we were known as Hyperboreans and you get Origen seething that he and his people were actually the older and wiser and more spiritually developed ones, not us. Sadly, the agents of Jerusalem bribed and intermarried with the nobility of Kiev-Rus and centuries of backwards spiritual repression followed from which we have never recovered.

The UK was behind Zelensky's decision to withdraw from the Minsk agreements, which provoked the war. Britain torpedoed the Istanbul Accords, which could have ended the conflict at its very beginning. Great Britain is doing everything to ensure that the conflict does not end.

They told me that I was right. That behind this **there is something personal between the London elites and Putin.** There's probably money involved. I don't know the answer, but perhaps it lies in Khodorkovsky's words about the Rothschild family. Maybe not there, but something similar.

He is referring to a recent interview. More-or-less the same thing is said there. [Here](#) is another summary of it:

Mr. Khodorkovsky turned himself in and confessed. Having privatized public property, he handed over its management to an honest guy, the American oligarch Rothschild. American oligarchs are examples of honor, decency and concern for humanity. They are infallible and holy, not like the oligarchs of other countries 😊 I wonder, does Khodorkovsky the idiot really think so or is he putting on a cheap show for suckers?

NOTE: Rothschild is actually technically British not American, but even more accurately, he is an ethnic Phoenician.

(...)

I watched again this episode (https://t.me/t_arlm/3186) of Khodorkovsky's interview, in which he admits that Yukos, in fact, belonged to the American oligarch Rothschild.

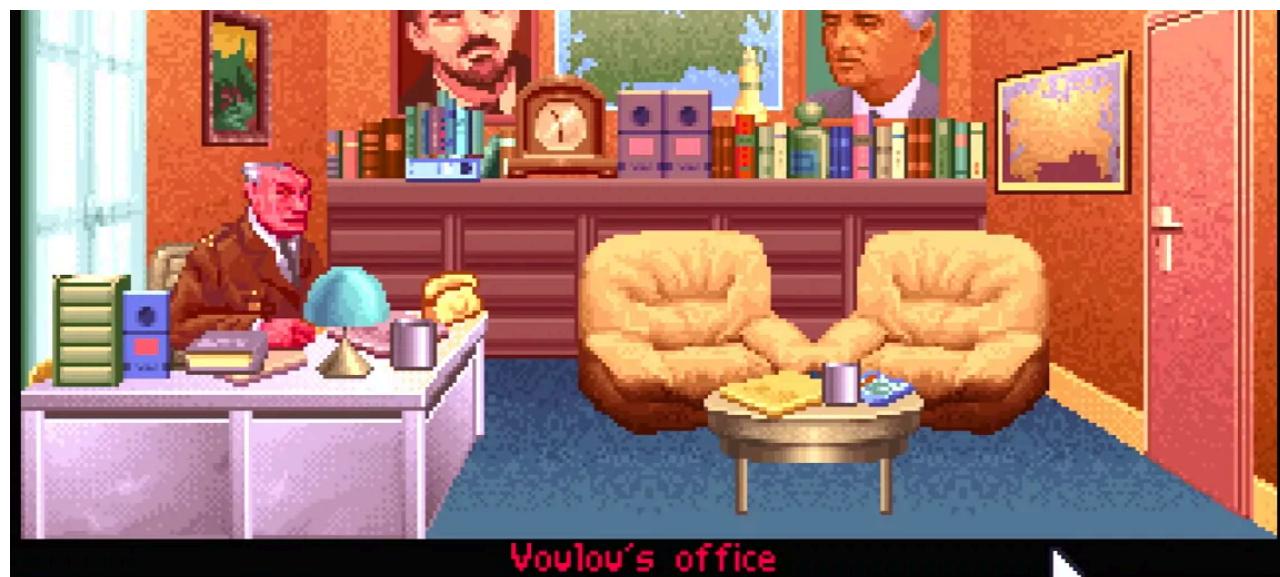

We all remember what happened to Yukos. It turns out that Putin stupidly wrested Yukos from Rothschild, and sent his man to prison. Based on this, the conclusion naturally suggests itself that the position of some ardent patriots who claim that American oligarchs call Putin and give him orders is somewhat incorrect. **A person who is given orders cannot squeeze such a huge piece of property from his masters.**

Correct.

Putin and the faction behind Putin (the Andropovites, conservative Convergionists) want their share of the pie. They believe that the looting should be done by *them*. This is the principle behind “patriotic corruption” that Dugin used to talk about.

VIII. The Great Russian Restoration: A Pivot to “Patriotic” Corruption

RURIK SKYWALKER . APRIL 8, 2022

I promised an article on the pro-Kremlin faction of the oligarchs, but that will have to wait until we get a final head count of who fled and who stayed in Russia. Friends today, enemies tomorrow — such is life in... well just about anywhere nowadays. Instead, we should probably say a few words about corruption, the security services and the way business ...

In other words, the elites of the eastern shtetl feel like Russia and parts of the FSU are their turf and they will fight, to a certain level, to ensure that their looting operation is not disturbed by their cousins in New York and, apparently, the city of London.

Bit by bit we are unravelling the true reasons behind the conflict between Moscow and London and Washington.
